

**HYPER STREAMLINER**

**8474**

**FITS: ANY STANDARD HYPERCHARGER**

PART#	INCLUDED
408474	1 Faceplate
200845	2 1/4" I.D. x .425" O.D. x .062" Flat Washers
308474	1 Instruction Sheet

**TOOLS SUGGESTED**

3/16" Allen wrench

**PROCEDURE** AVERAGE TIME: 10 MINUTES

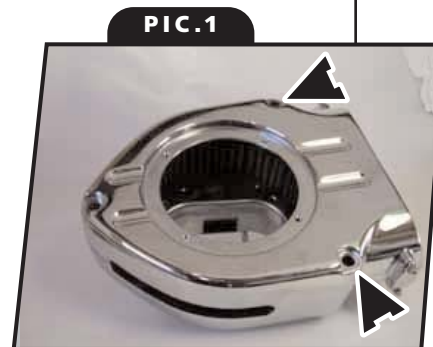

**STEP 1** Remove the existing trap door from the Hypercharger

**STEP 2** If you have been using the "Blood Groove" trap door, the cone shaped rubber gasket will be re-used. If you have been using the "dimpled" trap door, the cardboard gasket **AND** trap door will both be retained. In either case, leave the appropriate gasket or assembly in place in the round opening in the Hypercharger. The bolt holes in these components need not line up, as no fasteners will be used in this location. The new faceplate will hold these components in place.

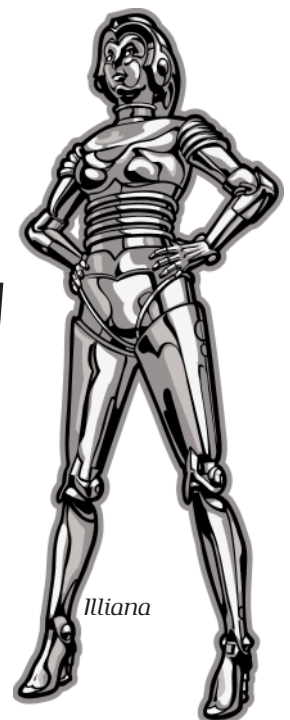

**STEP 3** With a 3/16" Allen Wrench, remove the three 1/4" Socket Head Cap Screws that hold the two halves of the air cleaner body together. Set the faceplate in place on the Hypercharger. Re-install the rear bolt first, but do not tighten completely at this time. Carefully inspect the front two mounting points for ANY gap between the faceplate and the Hypercharger body. If small gaps are present, insert the two small washers filling the gaps. Re-install the front two bolts. Tighten the three mounting bolts. The faceplate should fit completely flush against the outer surface of the Hypercharger. See PIC.1.

**Caution** Failure to use the spacer washers if gaps exist at the front mounting points can result in a cracked faceplate.

*Ride On!*

Add spacers here if needed
